Conveyor Rolling Chain Replacement

Reference 027

The Glasstech Rolling Chain (Glasstech part number S-CCR2AG0810001) as used on furnace conveyors is no longer available, and is being replaced with an alternate design (Glasstech part number S-CCRCCG0810001). While not compatible as a partial replacement (or splice) with the original design, it is dimensionally compatible, can be directly replaced as an entire chain set, and should not require re-leveling of furnace conveyors. The alternate design chain will be in stock at Glasstech in the near future. Please contact Glasstech Aftermarket Sales Department for information on fitting this chain to your furnace when a chain replacement is required.

If any technical questions occur regarding this new chain or its implementation, please contact the Glasstech Customer Service Department at the numbers listed above.
